

Publication Ethics and Malpractice Statement requirements

1. Editorial Board

The journal “Economics and Computer Science” (ISSN 2367-7791) has [an Editorial board](#) with recognized experts in economics and computer science. Contact information with the editorial office of the journal is given on the [journal web site](#) link “[For authors](#)”.

2. Authors and Authors responsibilities

There are no article processing charges or publication fees. Authors are obliged to participate in the peer review process. All authors of the submitted papers are obliged to have significant contribution to the research. All authors are obliged to provide retractions or corrections of mistakes. List of references is given in English, Harvard style according to the [paper template](#). If an author has received a financial support or the manuscript is written within a project, a proper credit should be given. The submitted manuscript should not be submitted elsewhere for reviewing. The source of each table and figure should be given. If a figure (or table) is cited, the authors must have permission from the author/authors of the cited source.

3. Peer-review process

All articles are subject to single-blind peer-review. The author (authors) does not know the name of reviewers. Each article is reviewed by a member of the [Editorial board](#) and a prominent researcher. The reviewers are chosen in a way that they have no conflict of interest with the authors. Reviewed articles are treated confidentially. The Editor-in-chief’s final decision of acceptance, rejection, minor or major revisions is on the basis of plagiarism check and reviews.

4. Publication ethics

Publishers and editors take reasonable steps to identify and prevent the publication of papers where research misconduct has occurred. If a journal's publisher (or editors) is made aware of any allegation of research misconduct, the publisher (or editors) deal with allegations appropriately. The reviews from reviewers are sent back to the authors of the submitted articles. Publishers and editors are willing to publish corrections, clarifications, retractions and apologies when needed.

For the purpose of publication ethics the assigned **reviewer** is asked to declare any current or potential conflict of interest to the authors of the manuscript like:

- working within the same department of the organization / institution as one of the authors;
- acting as a co-author, collaborator, joint grant holder, or has any direct academic link, with any of the authors within the past three years;
- having a close personal relationship, rivalry or antipathy to any of the authors;
- gaining or losing financially from publication of the paper;
- having any other non-financial conflicts of interest (political, personal, religious, ideological, academic, intellectual, commercial or any other) with any of the authors;

Until the article is published, reviewers are obligated to keep the whole content of the manuscript confidential. Reviewers are also responsible not to reveal their identity to the authors, either in their comments or in metadata for reports submitted in Microsoft Word or PDF format.

In case an unpublished material is disclosed the submitted manuscript can not be used in a reviewer's own research without the express written consent of the author. Privileged information or ideas obtained through peer review are kept confidential and not used for personal advantage.

Reviewers are not allowed to:

- recommend citation of work by themselves, close colleagues, another author, or the journal when it is not clearly necessary to improve the quality of the manuscript under review;
- recommend excessive citation of their work (self-citations), another author's work or articles from the journal where the manuscript was submitted as a means of increasing the citations of the reviewer/authors/journal.
- consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

Reviewers are responsible to maintain a neutral tone and focus on providing constructive criticism about the authors' work. Derogatory comments by reviewers are not tolerated.

Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible is obligated to notify the editor and excuse himself (herself) from the review process

Publication ethics concerning **authors** are stated as it follows:

- Authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others, that this has been appropriately cited or quoted;
- Authors may be asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data, if practicable;

- An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behavior and is unacceptable. In general, an author should not submit for consideration in another journal a previously published paper;

- Authors should cite publications that have been influential in determining the nature of the reported work. Information obtained privately, as in conversation, correspondence, or discussion with third parties, must not be used or reported without explicit, written permission from the source;

- Authorship is limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

- All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript.

- When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper. If the editor or the publisher learns from a third party that a published work contains a significant error, it is the obligation of the author to promptly retract or correct the paper or provide evidence to the editor of the correctness of the original paper.

The **editor's** responsibilities in publication ethics are in terms of the following:

- The editor is responsible for evaluation of manuscripts for their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

- The editor and the editorial staff are obligated not to disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate. In case an unpublished material is disclosed the submitted manuscript can not be used in the editor's own research without the express written consent of the author. Privileged information or ideas obtained through peer review is kept confidential and not used for personal advantage.

- The editor takes responsive measures when ethical complaints have been presented concerning a submitted manuscript or published paper. Such measures may generally include contacting the author of the manuscript or paper and giving due consideration of the respective complaint or claims made, but may also include further communications to the relevant institutions and research bodies, and if the complaint is upheld, the publication of a correction, retraction, expression of concern, or other note may be relevant. Every reported act of unethical publishing behavior will be looked into, even if it is discovered years after publication.

5. Copyright and Access

The journal and the articles are distributed over the [CC BY license](#). Journal articles are visible online full-text without any fees. The [Open access policy](#) is published on the [journal's web site](#).

6. Archiving

The journal is archived automatically by backups by “Sky super hosting” (www.superhosting.bg). Individual issues are kept by the co-editors in chief and by the person who makes the prepress of the journal.

7. Ownership and management

The journal “Economics and Computer Science” is owned and managed by “Knowledge and business – Varna” (VAT number: BG201700477). Publisher and co-editor-in-chief: Svetlozar Stefanov.

8. Web site

The web site of the journal “Economics and Computer Science” and the publisher is:

http://eknigibg.net/index.php?route=information/information&information_id=8

9. Publishing schedule

The journal has regular publishing schedule (two issues per year – one issue in June and in one issue in December) since 2020.

10. Name of the journal

The journal name is “Economics and Computer Science”. The ISSN is 2367-7791.
